SUMMARY

Frontend Developer with 2+ years of experience building scalable web applications, business platforms, dashboards, and Web3 products using React.js, Next.js, TypeScript, and JavaScript. Delivered 25+ production-ready applications with a focus on performance, responsive design, and reusable component architecture. Experienced in transforming Figma designs into pixel-perfect user interfaces and integrating APIs and blockchain wallets for real-world products.

EXPERIENCE

Frontend Developer

Blockmob Labs - Islamabad - Sep 2024 – Present

- Delivered and maintained 20+ production-grade web applications using React.js and Next.js.
- Built complex dashboards, wallet extensions, and Web3 platforms serving real users.
- Implemented wallet integrations using MetaMask, Ethers.js, and Solana Web3.js.
- Implemented secure transaction signing and authentication flows.
- Converted Figma designs into pixel-perfect UI using Tailwind CSS and MUI.
- Improved application performance through component optimization and state management.

Frontend Developer

Marktech - Part-time Remote - Jan 2026 – May 2026

- Developed 5+ web applications using React.js, HTML5, CSS3, and JavaScript.
- Converted Figma designs into production-ready user interfaces.
- Developed and customized WordPress and Webflow websites based on business requirements.
- Built reusable UI sections and interactive components to accelerate website development.

Frontend Developer (Internship)

Capstone Technology Group - June 2024 – Aug 2024

- Developed 5+ responsive landing pages and dashboards for blockchain projects.
- Built reusable UI components using React.js and Tailwind CSS.
- Implemented wallet integration features for Web3 applications.
- Optimized frontend performance and improved code reusability.

SKILLS

Frontend: React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3

Styling: Tailwind CSS, Material UI (MUI), Bootstrap

State Management: Redux Toolkit, Context API

API & Data Fetching: REST APIs, WebSocket, Axios, React Query

Forms & Authentication: React Hook Form, JWT Authentication

Tools: Git, GitHub, Vercel, Postman, npm

Performance: SSR, SSG, Code Splitting, Lazy Loading, SEO Optimization

EDUCATION

Bachelor of Science in Computer Science

PMAS Arid Agriculture University Rawalpindi - 2020-2024

PROJECTS

Axon Wallet Extension

- Built a secure Web3 browser extension wallet using React and Tailwind CSS.
 - Developed multi-chain support for 16+ blockchain networks including Ethereum, Solana, and Tron.
 - Implemented secure wallet features like mnemonic generation, private key import.
 - Integrated DeFi features including token swaps, cross-chain bridging, and limit orders.
 - Added support for prediction markets like Polymarket.
 - Designed a responsive UI with dashboard, transactions, and real-time updates using Redux Toolkit.
 - Improved performance by optimizing rendering and state updates for a smoother user experience.
-

Gaya Wallet Extension

- Built a secure multi-chain browser extension wallet supporting multiple blockchain networks.
 - Implemented wallet creation, import/export, and secure key management workflows.
 - Integrated send/receive functionality, transaction history, and token portfolio details.
 - Implemented cross-chain token swap functionality and optimized wallet interactions.
 - Secured sensitive wallet data using AES encryption and protected local Chrome storage.
-

Magnus

- Developed trading and education dashboard using React.js and Tailwind CSS.
 - Integrated real-time APIs and WebSocket-based updates.
 - Built dashboards for signals, rewards, and user analytics.
 - Improved UI performance and responsiveness across devices.
 - Created reusable components to maintain consistency and speed up development.
-

Iltezam

- Built a responsive donation and volunteering platform using Next.js with SSR and API integrations.
 - Developed user dashboards for donors and volunteers with dynamic routing.
 - Implemented role-based access control for NGOs, donors, and volunteers.
 - Designed clean, mobile-friendly UI using Tailwind CSS with focus on usability and performance.
 - Enabled organizations to post opportunities and users to browse and apply through dashboards.
 - Ensured SEO optimization, form validation, and cross-browser compatibility.
-

Evox

- Built a real estate tokenization platform using React.js for managing property investments.
 - Enabled developers to tokenize real estate assets and allow fractional ownership for investors.
 - Integrated smart contracts to handle ownership distribution and secure investment transactions.
 - Implemented automated system for calculating and distributing monthly ROI to token holders.
 - Designed a user-friendly interface for browsing properties and tracking returns in real time.
-

Logistics Goods Transportation App (FYP)

- Developed a logistics platform enabling users to book vehicles and transport goods between cities.
- Implemented real-time shipment tracking, live chat, and order management features.
- Designed a route optimization workflow to help drivers secure return orders.
- Improved user experience through form validation and mobile-friendly design.
